

Forest School

Autumn 1 2026

Friday Group

Week 1

Exploring the forest

For our first week back we had fun coming back together and exploring how the forest has changed over the summer. We found so many bugs and butterflies and all of the plants had grown so tall!

Week 2

Knots

This week we loved learning how to tie a reef knot and a slip knot. We worked together in pairs to take it turns to learn our knots. We were so proud!

We also planted our herbs today. We chose to grow rosemary, oregano and basil in our new propagator!

Week 3

Photography

This week we were very lucky to be able to try our hands at photography! We all picked something in the forest to photograph and had fun learning to use the camera!

Week 3

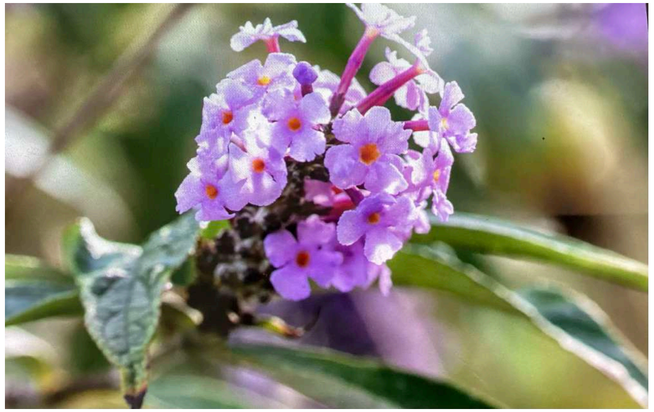

Our photos

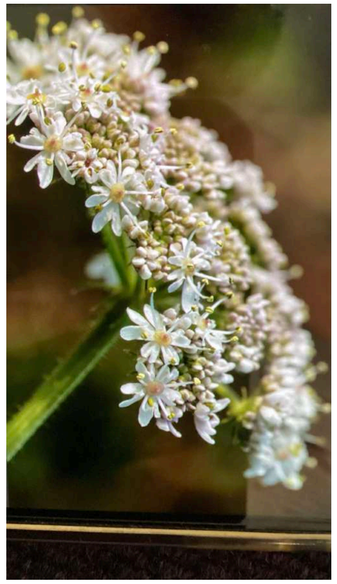

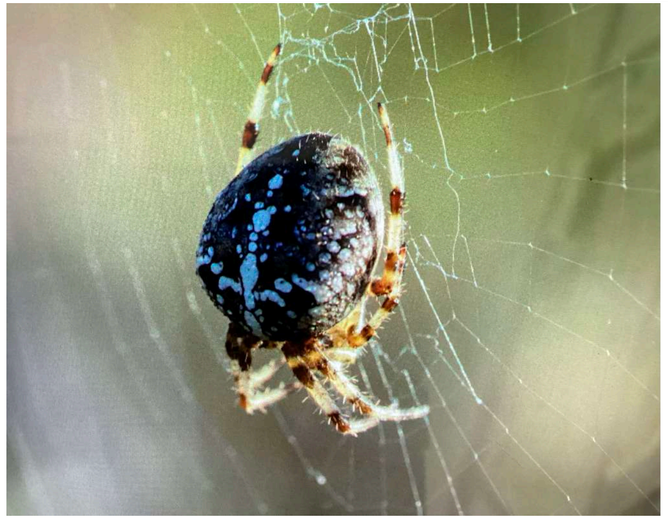

Week 4

Photography- Long lens

Clay creatures

This week we have been taking beautiful photos of our forest school area with a long lens! We all chose our favourite part of forest school to photograph.

We all got to make some clay creatures using clay, sticks, conkers and sycamore seeds.

Week 4

Our photos

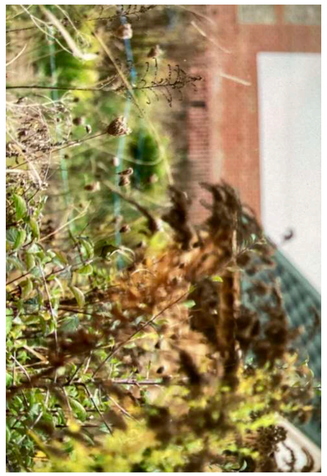

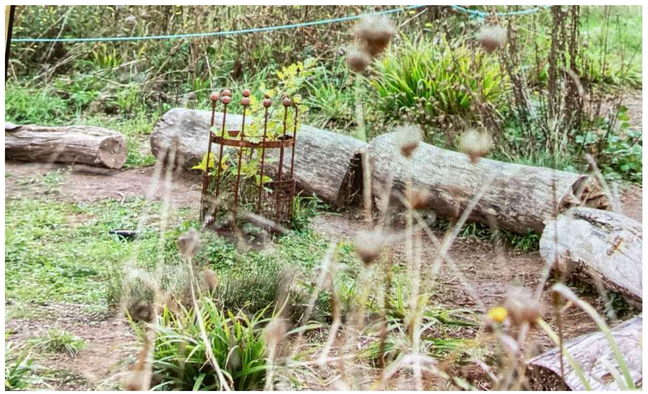

Week 5

Autumn

This week we went on a lovely autumnal walk to collect some beautiful leaves. We then decorated a pumpkin shape with our leaves!

We also enjoyed using pastels to make our own observational drawings of pumpkins.
